PROFESSIONAL SUMMARY

Creative and detail-oriented Front-end developer, React.js developer, UI/UX designer and graphic designer with a multidisciplinary background spanning software engineering studies, responsive web development and professional visual design. Experienced in creating identity and marketing materials, social media graphics, print collateral and web assets, while also developing interactive interfaces that bring visual concepts into practical use.

Uses HTML5, CSS3, JavaScript and React to create responsive, interactive digital experiences. Brings a design-led approach to front-end work, considering information hierarchy, typography, spacing, navigation and consistency alongside technical structure. Familiar with reusable component patterns, responsive layouts, semantic markup, accessibility awareness, cross-browser considerations and performance-conscious implementation.

Professional graphic design experience at Yumarib Concept includes collaborating with senior designers on branding and promotional work, producing digital and print materials, and managing several assignments while maintaining quality and deadlines. This work strengthened practical skills in composition, color theory, feedback, communication and adapting visual output to different audiences and formats.

Combines analytical thinking developed through Industrial Mathematics with creative judgment and a user-centered mindset. Values clear communication, reliability, constructive feedback and continuous learning. Seeks opportunities to contribute thoughtful design and dependable front-end implementation while continuing to grow across software development, user experience and visual communication.

PROFESSIONAL EXPERIENCE

Graphic Design Intern / Junior Graphic Designer

Yumarib Concept · Shomolu, Lagos, Nigeria

📅 October 2020 – December 2025

Worked with senior designers on branding, promotional and marketing work for digital and print. Developed visual assets for campaigns, social media and websites, applying design fundamentals and responding to project feedback.

- Designed digital and print marketing materials for client campaigns.
- Created promotional graphics for advertisements, flyers, brochures, posters, banners and business cards.
- Produced social media graphics aligned with brand identity and campaign goals.
- Collaborated with senior designers on branding, promotional and web design projects.
- Created website banners, icons, illustrations and other digital assets for online campaigns.
- Applied typography, color theory, layout and composition to create clear, visually engaging designs.
- Managed several design assignments while meeting deadlines and maintaining quality.
- Incorporated feedback and contributed ideas throughout the design process.
- Built experience with client communication, constructive criticism and adapting to changing requirements.

AREAS OF EXPERTISE

FRONT-END DEVELOPMENT

- Responsive website development
- Mobile-first layouts
- Semantic HTML
- Interactive user interfaces

- Reusable components
- Cross-browser compatibility
- Accessibility awareness
- Clean and maintainable code

UI / UX DESIGN

- User interface design
- Wireframing and prototyping
- User flows
- Information architecture
- Visual hierarchy
- Usability-focused layouts
- Responsive interfaces
- Design consistency

GRAPHIC DESIGN

- Brand identity and logos
- Social media graphics
- Print design
- Flyers and posters

- Business cards
- Marketing assets
- Image retouching and manipulation
- Mockup design

CAREER HIGHLIGHTS

- Completed the Advanced Diploma in Software Engineering with Distinction.
- Completed a B.Sc. in Industrial Mathematics with a Second Class Lower Division.
- Developed practical experience across responsive front-end development, graphic design, branding and UI design.
- Continued expanding knowledge of front-end technologies and design tools through ongoing learning.

PROFESSIONAL OBJECTIVE

To contribute front-end development, UI/UX and graphic design capabilities to an organization building useful, accessible and engaging digital experiences. Apply sound visual judgment and practical web development skills to create clear interfaces, responsive layouts and communication materials that support real user needs and organizational goals.

Continue developing as a software and design professional through collaborative work, thoughtful feedback and ongoing learning. Strengthen technical depth in modern front-end development while maintaining a strong foundation in usability, visual communication, clean implementation and dependable delivery.

ABOUT

Technology and design appeal to me because they combine imagination with practical problem-solving. I enjoy understanding what a person or organization needs to communicate, then shaping that intention into an experience that is clear, useful and visually coherent. I value work where both the details and the overall purpose matter.

My academic background in Industrial Mathematics has helped me develop an analytical and structured way of thinking. Studying software engineering and working in graphic design have added technical and creative dimensions to that foundation. Together, these experiences influence how I approach new challenges: break them down, understand the constraints, consider the audience and work toward a solution that is functional, effective, visually appealing and purposeful.

I am especially interested in the relationship between design and implementation. I enjoy exploring layout, typography, hierarchy and interaction, and understanding how those choices translate into responsive interfaces and useful visual communication. I remain curious about new modern tools, technologies and methods, welcome constructive input/criticisms, and see continued learning as part of producing better work.

DESIGN & DEVELOPMENT PHILOSOPHY

Begin with people and purpose

Good design and development start with a clear understanding of the audience, the information they need and the outcome the work should support. I consider the purpose of a page or visual before choosing its structure, layout, content order or presentation. This helps keep decisions focused and makes the final experience easier to understand and use.

Make clarity part of the visual design

Typography, spacing, contrast, alignment and visual hierarchy are practical tools for guiding attention. I aim to use these elements consistently so that content feels organized, important information is easy to find and the interface communicates with confidence. **A polished appearance should reinforce meaning rather than compete with it**.

Design for different screens and accessibility

A digital experience should remain legible and usable across phones, tablets and larger displays. I treat responsive behavior as part of the design from the outset and pay attention to semantic structure, readable content, keyboard access and inclusive interaction patterns. Accessibility awareness improves the experience for more people and encourages clearer implementation.

Build with care for the details behind the interface

Maintainable structure, reusable components, consistent patterns and considered performance all contribute to a dependable experience. I value clean, understandable code and deliberate implementation because these qualities make an interface easier to refine, support and extend as requirements change.

Deliver complete and dependable work

I consider delivery part of quality: clarify expectations, organize the work into manageable stages, communicate progress and review the finished result against its requirements. I welcome feedback, make considered refinements and aim to deliver polished, complete work on time with a clear handoff so it can be used and maintained confidently.

EDUCATION

• University of Lagos (UNILAG)

Akoka, Lagos, Nigeria

Bachelor of Science (B.Sc.), Industrial Mathematics

Applied & Computational Mathematics Option

Second Class Lower Division

📅 October 2019 – September 2025

The programme where I developed analytical and quantitative problem-solving skills through Mathematical and Computational study.

• Aptech Computer Education

Maryland, Lagos, Nigeria

Advanced Diploma in Software Engineering (ADSE)

Distinction

📅 June 2020 – December 2023

Professional software engineering programme I completed at Aptech's ACE-Lagos-1 centre.

TECHNICAL SKILLS

FRONT-END TECHNOLOGIES

- HTML5, CSS3, OO-CSS, BEM
- JavaScript (ES6+, ESNext)
- React.js, Vue.js, Next.js
- TypeScript
- Angular
- JQuery/JSON
- DOM and Browser APIs
- REST APIs
- Bootstrap CSS, Tailwind CSS, Sass
- Git & GitHub
- Netlify & Vercel
- Responsive Web Design
- Web Performance Optimization
- OGP & Search Engine Optimization (SEO)

DESIGN

- Graphic design
- UI design
- UX design
- Web design
- Brand identity
- Typography
- Color theory
- Layout & composition
- Responsive design

TOOLS & PLATFORMS

- Figma
- Adobe Photoshop
- CorelDRAW
- Canva
- Visual Studio Code
- Git & GitHub
- Microsoft Office

PROGRAMMING & SOFTWARE FOUNDATIONS

- Python
- Node.js
- Component-based UI
- Cross-browser development
- Web accessibility awareness
- Performance awareness

PROFESSIONAL STRENGTHS

- Creative problem-solving
- Analytical and critical thinking
- Attention to detail
- Time and project organization
- Team collaboration
- Effective communication
- Adaptability and quick learning
- User-centered mindset
- Accepts constructive feedback
- Reliability and deadline management

CERTIFICATIONS & RECOGNITION

Advanced Diploma in Software Engineering

Aptech Computer Education · Distinction

📅 Completed March 2023

Graphic Designing with Adobe Graphic Design Softwares

Yumarib Concept · Training ended

📅 Completed December 2025
